

easyverb Installation Process

Please follow these steps in order to perform a correct installation of the easyverb plugin.

1 INSTALLATION

Double click on InstallEasyverb.

Follow the steps to install the plugin.

It is recommended to choose 'Common Files' as source directory, on Windows, or '/Library/Audio/Plug-Ins' as source directory on MacOS.

NOTE: If you are running a 64 bit machine, make sure that the installation folder is not set as Program Files (x86) or any subdirectory inside it.

2 USER REGISTER

Run the file 'machID' provided next to the installer.

This shows the ID with which you will complete the registration of your user, and identifies your computer.

Copy this ID and send it to **support@hongo.digital**

Then we will confirm that your data is validated and you will be able to run easyverb, register with your username and password and enable the program.
